BEAUTY & WELLNESS

AI-Powered Customer Personalization Dashboard

Final Analytical Report

1. Executive Summary

This report presents insights derived from the final version of the Beauty & Wellness AI-Powered Customer Personalization Dashboard. The analysis is based on a complete sample of **100 customers**. Key findings indicate a healthy Average Order Value of ■**2,580**, full marketing opt-in, strong preference for Skincare, and clear dominance of Marketplace channels (Amazon/Myntra). Two customer segments — GenZ Trend Explorers and Wellness Conscious Routiners — together represent 51% of the base and should be prioritised for personalisation strategies.

2. Final Dashboard Overview

The completed interactive dashboard contains four KPI cards, four slicers (Location, Age Group, Preferred Category, Proposed Segment), and six analytical visuals arranged in a clean 2×3 grid.

Figure 1: Final Beauty & Wellness AI-Powered Customer Personalization Dashboard

3. Key Performance Indicators

Metric	Value	Insight
Total Consumers	100	Complete sample of 100 customers
Total Purchases	100	Every customer in the sample has purchased
Average Order Value	■2,580	Healthy AOV for the beauty & wellness category
Marketing Opt-In	100	Full permission base for engagement campaigns

4. Customer Segment Distribution

Customers are grouped into five behavioural segments. The distribution reveals a clear concentration in trend-driven and wellness-focused groups.

Segment	Share	Count	Priority
GenZ Trend Explorers	26%	26	High
Wellness Conscious Routiners	25%	25	High
Premium Efficacy Seekers	23%	23	Medium-High
Value-Driven Minimalists	17%	17	Medium
Clean & Sustainable Advocates	9%	9	Niche

Insight: *GenZ Trend Explorers + Wellness Conscious Routiners = 51% of the customer base. These two segments should receive the highest personalisation focus.*

5. Preferred Product Categories

Skincare is the clear hero category, followed by Makeup and Wellness/Supplements. Fragrance ranks lowest in preference within this sample.

Rank	Category	Relative Strength
1	Skincare	Dominant (highest by a wide margin)
2	Makeup	Strong secondary category
3	Wellness / Supplements	Solid mid-tier demand
4	Bodycare	Moderate
5	Haircare	Lower preference
6	Fragrance	Lowest in this sample

Insight: *Product recommendations, bundles, content, and campaigns should heavily feature Skincare.*

6. Shopping Channel Analysis

Rank	Channel	Observation
1	Marketplace (Amazon/Myntra)	Primary sales channel
2	App / Website	Strong owned-channel performance
3	Social Commerce (Instagram/TikTok)	High growth potential
4	Offline Retail	Secondary contribution
5	Influencer Referral	Lowest but valuable for acquisition

Insight: *Marketplace + App/Website drive the majority of purchases. Social Commerce is already the third strongest channel and deserves increased investment.*

7. Purchase Frequency Analysis

Most customers purchase on a monthly cadence. High-frequency (weekly+) buyers form a smaller but valuable group. There is clear opportunity to shift Medium and Low frequency customers upward.

- **Medium (Monthly)** – Largest group
- **High (Weekly+)** – Second largest
- **Low (Quarterly)** – Similar size to High
- **Occasional** – Smallest group

Insight: *Launch replenishment reminders and subscription offers targeted at Medium and Low frequency buyers.*

8. Purchases by Customer Segment

Although GenZ Trend Explorers are the largest segment by headcount, **Wellness Conscious Routiners** generate the highest purchase volume. Clean & Sustainable Advocates contribute the least.

Ranking (Highest → Lowest Purchase Volume):
1. Wellness Conscious Routiners
2. GenZ Trend Explorers
3. Premium Efficacy Seekers
4. Value-Driven Minimalists
5. Clean & Sustainable Advocates

9. Budget Preference Analysis

Budget Band	Share	Implication
Premium (■1,500–4,000)	27%	Slight lead – good mid-premium opportunity
Value (■500–1,500)	26%	Almost equal to Premium
Luxury (>■4,000)	24%	Strong luxury appetite exists
Budget (<■500)	23%	Entry-level customers still meaningful

Insight: *Demand is well distributed across price points. Tiered personalisation by budget band (different messaging & product recommendations) is recommended.*

10. Strategic Recommendations

• **1. Prioritise two core segments** — GenZ Trend Explorers and Wellness Conscious Routiners (51% of base + high purchase volume).

• **2. Make Skincare the hero** — Feature it heavily in personalisation engines, bundles, email content and social creatives.

• **3. Strengthen Marketplace + App experience** — These are the top two revenue channels; optimise conversion and recommendation quality there.

• **4. Scale Social Commerce** — Already 3rd strongest channel; invest further in Instagram/TikTok shopping and creator partnerships.

• **5. Introduce replenishment & subscription offers** — Target Medium (Monthly) and Low (Quarterly) frequency customers to increase purchase cadence.

• **6. Apply budget-tier personalisation** — Serve different product recommendations and messaging for Premium, Value, Luxury and Budget shoppers.

• **7. Protect and grow high-value Routiners** — Wellness Conscious Routiners generate the highest purchase volume; create loyalty and routine-building programmes for them.

11. Dashboard Quality Assessment

Area	Status	Comment
Visual Layout	Excellent	Clean 2×3 grid + KPI row
Chart Labelling	Good	Previously corrected; now accurate
KPI Clarity	Good	Clear and consistent
Interactivity (Slicers)	Good	Location, Age, Category, Segment present
Colour Consistency	Acceptable	Can be enhanced with brand palette
Overall Professional Look	Strong	Ready for stakeholder presentation

12. Conclusion

The final dashboard is well-structured, correctly labelled, and delivers clear, actionable insights. It successfully supports AI-powered customer personalisation use cases by revealing segment behaviour, channel preference, product affinity, purchase frequency and budget orientation. With only minor visual refinements recommended (background colour and a more refined colour theme), the dashboard is ready for business stakeholder presentation and operational use.
